## 1. Introduction

The purpose of this Manual is to establish the standard in which the data files and trails requested by BSM must be delivered, aiming to streamline data extraction work by Participants and their contracted technology providers and simplify the technical analysis that is performed in relation to the data necessary to carry out BSM's supervision and inspection.

The improvements of this version of the manual are highlighted (in yellow).

## 2. Scope of the Manual

The layout manual is applicable to all Participants of the listed market, regardless of the access category. This means that the rules and standards established in this document must be followed by all, without exceptions. This implies that all entities operating within the specified segment, whether as a Full Trading Participant, Trading Participant, Clearing Member, Settlement Participant, or Custody Agent, are required to adhere to the standards and guidelines set forth in the manual.

In the table below, there is a detailed overview of the applicable processes for each access category:

	RLP (Retail Liquidity Provider)	Registration	Suitability	Orders	Settlement / Margin Account	Treasury/Current Account	Custody	Risk / Compulsory Settlement	Investment Advisor	Internal Controls	AML/CTF (Anti-Money Laundering/Counter-Terrorism Financing)	Operations and Offers Supervision	Professional Certification	Information Security	Infrastructure Support
Full Trading Participation (PNP)	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•
Trading Participation (PN)	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•
Clearing Member (MC)					•			•		•			•	•	•
Exchange Clearing Member								•						•	
Settlement Participant (PL)		•			•			•		•	•	•*		•	•
Custody Agent (AC)		•					•			•	•			•	•

- Applicable Process
- \* Operations Supervision.

For a view of (i) the applicable process to the Participants by type of access to the organized markets administrated by B3 and (ii) of all tests to be concluded by layouts see **Appendix I** and **Appendix II**, respectively.

## 2.1 File Specification

The databases and audit trails defined in the layouts in section 3 of this document must follow the following specifications for delivery:

- File format: Apache Parquet<sup>1</sup>, .TXT with delimiter “|” or .CSV with delimiter “;”, text qualifier in quotation marks (“”) and header in the first line (ANSI or UTF-8 encoding);
- File name: Unquestionably, the names (in uppercase letters) must adhere to the formatting described in the respective sections of the layouts to be submitted, specifically in the File field.
- Line terminator configuration: Windows standard (CRLF);
- Field with multiple data: Insert a new line for each occurrence within the multiple field<sup>2</sup>, replicate the content without changes to other columns and change only the field in question;
- Fields not applicable: Leave the non-applicable field blank;
- Form of delivery: Electronic;
- Channel for transferring files: BSM Portal (in the folder corresponding to the previous month – for example: in February, carry out the upload in the January folder);
- Maximum file size: 2GB per file. If the file to be forwarded is larger than the maximum allowed capacity, it will be necessary to split it into more than one to upload it within the required parameters required (with the following nomenclature – e.g.: file\_1 and file\_2);

---

<sup>1</sup> The Parquet file is a columnar storage format designed for efficiently storing and processing large volumes of data. Unlike conventional file formats that store data by rows, Parquet organizes data by columns. This means that each column is stored separately, allowing for selective reading of the relevant columns for a specific query.

<sup>2</sup> Example: For cases in which the client has more than one asset as allocated guarantee, insert one row per asset, repeating the client’s other data in the other fields.

- The systems provided by B3 (e.g.: Sincad, CSD, ePuma, Line, among others) are out of the scope, since BSM has direct access to the data due to the organized markets administrated by B3;
- The content of the file headers is free and can be adapted as needed by the Participant. However, it is essential that (i) the file contains all fields in the order defined in the document; and (ii) the minimum formatting parameters are respected to ensure consistency and the correct interpretation of the data;
- Certain fields in the layouts are designated as mandatory, meaning they must be filled out without fail. However, there may be situations where the information required for a mandatory field is not available or does not apply to the context of the file being generated. For these cases, we request that the mandatory field be filled with the hyphen character ("-") as a placeholder;
- Files without content must be submitted blank, with only the header included;
- The Participant is responsible for validating the integrity of the file regarding minimum fields, format and content, before making it available to BSM.

Layouts developed before the implementation date can be forwarded to the BSM team for formatting tests. This procedure is an opportunity to ensure that everything is in accordance with the requirements and that possible adjustments are identified and made in advance. To facilitate the process and ensure the efficiency of the tests, we ask that the Participant who opts for early submission send an email to [bsm@bsmsupervisao.com.br](mailto:bsm@bsmsupervisao.com.br) with the subject “Monitoramento de Dados – Teste de Layout”, requesting the creation of the test item in the Portal for file upload. We remind you that early submission is not mandatory, but highly recommended to ensure a smooth transition on the official delivery date.

## 2.2 How to Send Files

The databases and audit trails defined in the layouts in section 3 must be available through the BSM Portal<sup>3</sup> within the requested item of the reference month (for example: in February, upload in the January folder) up to the tenth (10<sup>th</sup>) business day of the subsequent month.

---

<sup>3</sup> Exceptions (other ways of accessing/sending files) must be addressed with BSM to assess the process applicability.

- (a) The Layout submission to BSM is mandatory by the 10<sup>th</sup> business day of the month defined in the table.  
 (b) Files defined as “on demand” must be implemented by Participants according to the date mentioned in the table above.

The Participant must meet the dates, standard and format of deliveries, as defined by BSM. Requests for extension of deadlines must be substantiated by the Participant, containing new dates and rationale for BSM's reassessment.

For a better overview of the layouts delivery schedule, see **Appendix III**.

## 2.4 Applicability of Layouts

The Participant must send an e-mail to the address [bsm@supervisao.com.br](mailto:bsm@supervisao.com.br), up to 30 days before submitting the layout, with the title “Monitoramento de Dados – Aplicabilidade dos Processos”, informing which layouts are not applicable or subject to monitoring by BSM, with their respective justifications.

## 2.6 Data Storage at BSM

The data will not be stored in BSM and will be discarded after the information generation work. The Participant is responsible for storing the data according to current regulations.

## 2.7 Data Disposal

Data disposal is the process of fully destroying information, thus making any type of recovery impossible. In other words, after the disposal process, the data is considered irretrievable by anyone who subsequently has access to the file or environment where the information was stored.

Thus, data disposal is different from file deletion, where a file deleted from a device may be inaccessible to the end user, but the information remains, in some form, on the device's hard drive.

BSM follows the guidelines on the disposal of information generated or transmitted in its environments and systems, regardless of the storage medium, taking as parameters the B3 standards, current legislation, other regulations related to the topic and best management and information security practices.

## 2.8 Results Storage

The results of tests performed by BSM, through Data Monitoring, and their storage are the responsibility of the Participant. Thus, it is necessary that the Participant to adjust the reported nonconformities and revisit the internal processes and controls to improve the effectiveness of the results as the nonconformities are reported.

2	Nome Sistema	Identification of the system used to parameterize margins	Text	-	Yes
3	Data	Minimum margin setting date	Date	yyyy-mm-dd	Yes
4	Hora	Minimum margin setting time	Time (BRT)	hh:mm:ss or hh:mm:ss,sss	Yes
5	Usuário	User who configured the minimum margin	Text	-	Yes
6	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-” or “,”)	No
7	Ativo	Description of the parameterized asset (Mini Ibovespa Futures (WIN) and Mini U.S. Dollar Futures (WDO))	Text	-	Yes
8	IdValor/Quantidade	Description of the margin parameterization.	Text	Options: “Valor” or “Quantidade”	Yes
9	Valor/Quantidade (*)	Parameterized value or quantity for contract negotiation. (E.g.: 100.00 for WIN – 150.00 for WDO)	Number	With 2 decimal places separated by “.” and without the currency identifier (R\$, \$, etc.)	Yes

(\*) For systems that have parameterization by number of contracts, it is expected that the number of contracts parameterized for WIN and WDO will be recorded in the field.

### 3.1.4 Opt-in and Opt-out

File description: Record of the client’s express opt-in to use the RLP as well as for it opt-out, both for the derivative market and the stock market.

Objective: Monitoring whether there were client transactions with the RLP product before their opt-in and whether there were transactions with the RLP product after their opt-out

File name: OPTIN\_OPTOUT

Frequency: Quarterly

Scope: Covering the basis of the previous 3 months

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digits	Yes
2	Nome Sistema	Identification of the system used to register opt-in and opt-out	Text	-	Yes
3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (".", "-", ",")	Yes
4	AccountId	Identification of the client's user in the Participant's system.	Text	Plain text, without check digit and without punctuations (".", "-", ",")	Yes
5	EventType	type of event, RLP order opt-in or opt-out	Text	"in" or "out"	Yes
6	OptType [1]	segment type derivatives, equities or both	Text	"derivatives", "equities" or "all" (*)	See Table 2
7	EventTime	timestamp of the moment the client signed up or discontinued the RLP order	Date (BRT)	yyyy-mm-dd hh:mm:ss	Yes
8	ProcessTime <sup>[2]</sup>	timestamp of the time the client request was processed in the Participant's OMS	Date (BRT)	yyyy-mm-dd hh:mm:ss	See Table 2
9	EventOrderId <sup>[3]</sup>	identification of the person responsible for joining or discontinuing the RLP order	Text	Inform the user	See Table 2

(\*) In case of ALL, the field can also be forwarded blank

Table 2 – Applicability of fields	
Ref:	Details
[1]	Mandatory item only in the event of opt-in and opt-out specific to each segment. Non-mandatory item if the Participant uses generic opt-in and opt-out, that is, that they serve both the Derivatives and Equities segments.
[2]	If opt-in or opt-out are subsequently processed in the Participant's order management system, either through a daily routine or manually, for example, the base must include field 6 ("ProcessTime") containing the timestamp where the client request was processed internally. If opt-in and opt-out processing is carried out at the same time that the client subscribed or discontinued the RLP offer (real time), fill in the field with the same information as <i>EventTime</i> .
[3]	If the Participant has alternative flows through service channels (e.g. chat, telephone, email) to carry out the opt-in or opt-out, the base must include field 7 (" <i>EventOrderId</i> ") containing the person responsible for adhesion or discontinuation on behalf of the client.

### 3.1.5 List of Clients adhering to the use of RLP

File description: List of clients on the base date of “D-1”, who granted their authorization to use the RLP (opt-in). Example: For the quarter from November to January, extract the list of customers in the position of October 31

Objective: (i) Check for possible false positives in the analysis carried out for cases in which the client granted authorization to use the RLP (opt-in) in the period prior to the evaluated quarter; and (ii) alignment of the investment profile with the traded product.

File name: BASEOPTIN

Frequency: Quarterly

Scope: Photo on the base date of “D-1” at the beginning of the evaluated quarter

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digits	Yes
2	Nome Sistema	Identification of the system used to register opt-in and opt-out	Text	-	Yes
3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-“ or “;”)	Yes
4	AccountId	Identification of the client’s user in the Participant’s system	Text	Plain text, without check digit and without punctuations (“.”, “-“ or “;”)	Yes

## 3.2 Suitability

### 3.2.1 Suitability Questionnaire Questions and Answers

File description: Record of questions and respective answers from the Suitability questionnaire

Objective: Monitoring the allocation of the investment profile according to the questionnaire defined by the Participant

File name: QUESTIONARIO\_SUITABILITY

Frequency: Quarterly

Scope: List covering the basis of the previous 3 months

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digits	Yes
2	Nome Sistema	Identification of the system used to fill out the form	Text	-	No
3	Forma Análise	Detail the analysis method for CPF/CNPJ or Client Code	Number	CPF/CNPJ = "0" or Client Code = "1"	Yes
4	Código Cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (".", "-" or ",")	Yes (*)
5	CPF/CNPJ	Client's CNPJ; CPF	Text	Plain text without ".", "-", or ","	Yes (*)
6	Versão do questionário	Version of the questionnaire answered by the Client	Text	-	No (**)
7	ID_Pergunta	Question identification	Text	See layout 3.2.2	Yes (***)
8	ID_Resposta	Identification of the option selected by those who filled out the form	Text	See layout 3.2.2	Yes (***)
9	Pontuação	Score/Weight of the answer	Number		Yes
10	Perfil	Profile Name assigned to the client	Text	-	Yes
11	Usuário	User responsible for filling out the questionnaire (client or Participant internal user)	Text	-	Yes
12	Data	Date of completion of the questionnaire	Date	yyyy-mm-dd	Yes
13	Hora	Time of questionnaire filling out	Time (BRT)	hh:mm:ss or hh:mm:ss,sss	Yes

(\*) Mandatory only if the Participant has, during the evaluated period, more than one version of the questionnaire.

(\*\*) Fill in only if the Participant has, during the evaluated period, more than one version of the questionnaire.

(\*\*\*) The fields ID\_PERGUNTA and ID\_RESPOSTA must adhere to the standard established in layout 3.2.2.

### 3.2.2 Suitability Questionnaire Score

File description: Score of answers to the Suitability questionnaire

Objective: Monitoring the allocation of the investment profile according to the questionnaire defined by the Participant

File name: PONTUACAO\_SUITABILITY

Frequency: Quarterly

Scope: Photo on the base date “D-1” at the end of the evaluated quarter

Ref:	Field	Description	Type	Mandatory?
1	ID_Pergunta	Question identification	Text	Yes
2	Pergunta	Question to the client	Text	Yes
3	ID_Resposta	Identification of the answer option selected by the client.	Text	Yes
4	Opção_Resposta	Answer options for each question.	Text	Yes
5	Pontuação	Score/Weight of the answer (*)	Number	Yes
6	Versão do questionário	Questionnaire version	Text	Yes

Observation: Forward the data from this table on the same dates as the table above.

(\*) at field Pontuação it is mandatory the calculation of weight x score of the question.

### 3.2.3 Suitability Questionnaire Profile

File description: Suitability questionnaire profiles

Objective: Monitoring the allocation of the investment profile according to the questionnaire defined by the Participant

File name: PERFIL\_SUITABILITY

Frequency: Quarterly

Scope: Photo on the base date “D-1” at the end of the evaluated quarter

1	Pontuação mínima	Minimum score for the profile	Number	Yes
2	Pontuação máxima	Maximum score for the profile	Number	Yes

Ref:	Field	Description	Type	Mandatory?
3	Perfil	Profile Name	Text	Yes
4	Versão do questionário	Questionnaire version	Text	Yes

### 3.2.4 Client Investment Profile Base

File description: All client investment profile records (in the listed market) considering the answers to the Suitability questionnaire

Objective: (i) Monitoring the investment profile assigned to clients; and (ii) adjustment of the investment profile to the Participants that offers the RLP to clients.

File name: TRILHA\_SUITABILITY

Frequency: Quarterly

Scope: Photo on the base date “D-1” at the end of the evaluated quarter

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digits	Yes
2	Nome Sistema	Name of the system used to register the investment profile	Text	-	No
3	Data	Date of completion of the questionnaire	Date	yyyy-mm-dd	Yes
4	Hora	Time of questionnaire filling out	Time (BRT)	hh:mm:ss or hh:mm:ss,sss	Yes
5	Código Cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-” or “.”)	Yes
6	Perfil	Client investment profile	Text	-	Yes
7	Usuário	User who inserted or changed the profile (client or Participant internal user)	Text	-	Yes

### 3.2.5 Products Offered by Investment Profile

File description: List of products offered for each type of investment profile

Objective: Monitoring products offered to clients outside the investment profile; and (ii) adjustment of the investment profile to the Participants that offers the RLP to clients.

File name: PRODUTOSSU

Frequency: Quarterly

Scope: Photo on the base date “D-1” at the end of the evaluated quarter

Ref:	Field	Description	Type	Format	Mandatory?
1	Perfil <i>Suitability</i>	Enter the type of profile	Text	-	Yes
2	Produtos	Products available for the investment profile	Text	See 'Products Table' (*) (***)	Yes
3	Percentual	Percentage of products by Profile	Number	-	Yes (**)

(\*) If the profile has access to more than one product, fill in one (1) product per row in the available file and replicate the content without changing it to other columns and only change the field in question.

(\*\*) Applicable only to Participants who define the percentage of product per profile.

(\*\*\*) Insert one row for each product

Products Table – Products offered by B3

### 3.2.6 Risk term for non-compliant operations

File description: Risk term accepted by the client for non-compliant operations

Objective: Monitoring of communications to clients regarding profile non-compliance

File name: DESENQUAD

Frequency: On demand

Scope: On demand

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digit	Yes
2	Nome da ferramenta	Tool name	Text	-	No
3	Data	Date on which the client accepted the risk term for the non-compliant transaction.	Date	yyyy-mm-dd	Yes
4	Hora	Time at which the client accepted the risk term for the non-compliant transaction.	Time (BRT)	hh:mm:ss or hh:mm:ss,sss	Yes
5	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-” or “,”)	Yes
6	AccountId	Identification of the client's user in the Participant's system	Text	Plain text, without check digit and without punctuations (“.”, “-” or “,”)	Yes
7	Ativo desenquadrado	Noncompliant asset code	Text	-	Yes
8	Código do termo	Risk Term Code	Text	(*)	Yes

(\*) The field must be filled with the same code as field 1 of the TERMORISC layout

### 3.2.7 Risk Term Content

File description: Risk term made available to the client in non-compliant operations

Purpose: Monitoring communications to clients regarding non-compliance with the profile

File name: TERMORISC

Frequency: On demand

Scope: On demand

3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-“ or “,”)	Yes
4	Data	Communication date	Date	yyyy-mm-dd	Yes
5	Hora	Communication time	Time (BRT)	hh:mm:ss or hh:mm:ss,sss	Yes
6	Código Alerta	Alert type code (Limit 1, Limit 2 or Compulsory Liquidation)	Text	See “Table – Alerts”	Yes
7	Forma de Transmissão	Alert transmission method	Text	Options: “Email”, “Pop-up”, “SMS” or “Outros”.	Yes

Ref:	Field	Description	Type	Format	Mandatory?
8	Mensagem	Alert text sent to the client or template code used (to be validated during audits)	Text	-	Yes

Table - Alerts	
Code	Alert
L1	Limit 1
L2	Limit 2
LC	Compulsory Liquidation

If the Participant uses a website/portal to communicate the deterioration of guarantees before and after the compulsory settlement procedure, we request that the layout be filled out as follows:

Ref:	Field	Format
1	Código Participante	Insert the participant's code.
2	Nome Sistema	Insert the name of the system used to communicate with the client
3	Código do cliente	Leave as 99999 to avoid validation issues
4	Data	Date of the website/portal monitoring
5	Hora	Time of the website/portal monitoring (if monitoring is every 5 minutes, provide a line for every 5 minutes).
6	Alerta	Leave as 99999 to avoid validation issues
7	Forma de Transmissão	Fill in as "Outros - Portal/Site".
8	Mensagem	Fill in as "Portal/Site - Disponível" or "Portal/Site - Indisponível".

### 3.3.2 Blocking and Unblocking for the Client's Compulsory Liquidation

File description: Data on trading blocking carried out for clients in the process of compulsory liquidation and subsequent unblocking

Objective: Monitoring the trading blocking prior to the compulsory liquidation procedure and subsequent client unblocking

File name: LCBLOQUEIO

Frequency: On demand

Scope: On demand

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digit	Yes
2	Nome Sistema	Description of the tool the client was blocked from	Text	-	No
3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-“ or “,”)	Yes
4	Data Bloqueio	Client trading block date prior to the start of the compulsory liquidation procedure by the Participant	Date	yyyy-mm-dd	Yes
5	Hora Bloqueio	Client trading block time prior to the start of the compulsory liquidation procedure by the Participant	Time (BRT)	hh:mm:ss,sss	Yes
6	Data Desbloqueio	Date of unblocking client trading by the Participant after the compulsory settlement procedure and recomposition of guarantees and limits by the client	Date	yyyy-mm-dd	Yes
7	Hora Desbloqueio	Unblocking time (BRT) for client trading by the Participant after the compulsory settlement procedure and recomposition of guarantees and limits by the client	Time (BRT)	hh:mm:ss,sss	Yes
8	Data Liquidação	Date on which compulsory liquidation was performed	Date	yyyy-mm-dd	Yes
9	Hora Liquidação	Time at which compulsory liquidation was performed	Time (BRT)	hh:mm:ss,sss	Yes
10	ID da ordem	Zeroing order ID	Text	-	Yes

### 3.3.3 Guarantee Allocation

File description: Data on guarantees allocated by clients to carry out operations

Objective: Monitoring of the records of the clients guarantee allocation.

File name: LCALOCCGARANTIAS

Frequency: On demand

Scope: On demand

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digit	Yes
2	Nome Sistema	Name of the system used to manage guarantees	Text	-	No
3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-“ or “,”)	Yes
4	Data	Date of allocation of guarantees for carrying out operations by the client	Date	yyyy-mm-dd	Yes
5	Hora	Time of allocation of guarantees for carrying out operations by the client	Time (BRT)	hh:mm:ss,sss	Yes
6	Garantia Alocada	Value of guarantees or limit allocated for carrying out operations by the client. Note: If the allocation is carried out in values per asset, the trail must demonstrate the total defined value in this field, and the description of the assets allocated as collateral in the “Allocated Assets” field. If the allocation is carried out in terms of number of assets, the trail must demonstrate the defined number of assets for each of them in this field (E.g.: 1 WDO contract, 2 WIN contracts)	Number	With 2 decimal places separated by “,”	Yes
7	Ativos Alocados	Description of the assets allocated in guarantee by the Participant for the execution of operations by the client	Text	Enter each client asset on a separate row.	Yes
8	Usuário	User who carried out the guarantee allocation (client or internal user of the Participant)	Text	-	Yes

### 3.3.4 Position Control

File description: Data on the controls carried out by the Participant to open, close, reduce or increase positions by clients

Objective: Monitoring required guarantee X guarantee allocated at the time of opening the position

File name: **LCCONTROLE**

Frequency: On demand

Scope: On demand

3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-“ or “,”)	Yes
4	Data	Date on which the order is sent by the client	Date	yyyy-mm-dd	Yes
5	Hora	Time the order was sent by the client	Time (BRT)	hh:mm:ss,sss	Yes
6	Validade	Validity period of the Order	Date	yyyy-mm-dd	Yes
7	ID da ordem	ID of the order that consumed the guarantee (OrderID) (*)	Text	-	Yes
8	Ativo	Trading code of the asset subject to the order	Text	-	Yes
9	Quantidade	Number of assets in the order	Number	With 2 decimal places separated by “,”	Yes
10	Preço	Order price	Number	With 2 decimal places separated by “,”	Yes
11	Natureza	Type of order	Text	Options: “Buy” or “Sell”	Yes
12	Limite Pré-Operacional	Pre-operational limit of the client when sending the order to open or increase the position	Number	With 2 decimal places separated by “,”	Yes
13	Margens Depositadas	Margin values deposited by the client	Number	With 2 decimal places separated by “,”	Yes
14	Garantias Exigidas	Guarantee required from the client to open or increase the position (E.g. Minimum margins for futures contracts)	Number	With 2 decimal places separated by “,”	Yes

Ref:	Field	Description	Type	Format	Mandatory?
15	Valor	Amount of guarantee consumed (margin deposited – guarantee required)	Number	With 2 decimal places separated by “,”	Yes
16	Validação da ordem	Message indicating approval or rejection of the client order, if the client does not have a sufficient guarantee limit	Text	"Aprovação" ou "Rejeição"	Yes
17	Posição	Validate whether the order aims to increase or reduce the position	Text	“Yes or ”No”	Yes

(\*) Independently if the order was executed or not

### 3.3.5 Compulsory Liquidation

File description: Data on controls carried out by the Participant for compulsory liquidation of positions

Objective: Monitoring compulsory liquidation in accordance with the rules defined by the Participant

File name: LCZERAGEM

Frequency: Bimonthly

Scope: List covering the basis of the previous 2 months

Observations: The Participant that serves only institutional clients must have control over compulsory liquidation when they occur. The layout should be sent by the Institution to BSM only if the event (compulsory liquidation) occurs, and the delivery of the layout should be made by the Institution in the month following the occurrence (example: Compulsory Liquidation carried out on 07/30. The compulsory settlement layout (LCZERAGEM) should be made available on the 10th business day of August).

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digit	Yes
2	Nome Sistema	Name of the control system for compulsory liquidation	Text	-	No
3	Código do cliente	Client code at B3	Text	Plain text, without check digit and without punctuations (“.”, “-” or “.”)	Yes

Ref:	Field	Description	Type	Format	Mandatory?
4	Data	Compulsory liquidation date	Date	hh:mm:ss,sss	Yes
5	Hora	Compulsory liquidation time	Time (BRT)	yyyy-mm-dd	Yes
6	Garantias Exigidas	Value of the guarantees required from the client, necessary for the maintenance of their position at the time of mandatory settlement	Number	With 2 decimal places separated by “,”	Yes
7	Garantias Disponíveis	Value of the client’s available guarantees at the time of compulsory liquidation	Number	With 2 decimal places separated by “,”	Yes
8	Percentual de Perda / consumo	Percentage of loss considered by the Participant at the time they initiated the mandatory settlement of the client's position	Number (two decimal places)	-	Yes
9	ID da ordem	ID of the order that consumed the guarantee (OrderID)	Text	-	Yes
10	Percentual de zeragem	Percentage of zeroing defined in the Participant's policy for the activation of the zeroing robot	Number (two decimal places)	-	Yes
11	Sender location	Sender Location used in compulsory liquidation	Text	-	Yes
12	Usuário	User used for zeroing the position	Text	-	Yes
13	Sessão	Session used for zeroing the position	Text	-	Yes

(\*) The changes in nomenclature, structure and/or filling of the fields proposed in this layout will be valid for deliveries made from January/2025. Deliveries to be made before January/2025 must follow the layout structure specified in version 2.1 of this manual.

### 3.3.6 Compulsory Liquidation Parameterizations

**File description:** Data on the criteria adopted by the Participant to carry out the compulsory liquidation of clients

**Objective:** Monitoring compliance of compulsory liquidation with the rules defined by the Participant (Risk Routine)

**File name:** PARAMETROLIQ

**Frequency:** On demand

**Scope:** On demand

Ref:	Field	Description	Type	Format	Mandatory?
1	Código Participante	Participant Code	Number	Without check digit	Yes
2	Nome Sistema	Name of the control system for compulsory liquidation	Text	-	No
3	L1	Percentage of guarantee consumption that triggers threshold 1 communication	Number (two decimal places)	-	Yes (*)
4	Data_L1	Date of L1 parameterization	Date	hh:mm:ss or hh:mm:ss,sss	Yes (*)
5	Hora_L1	Time of L1 parameterization	Time (BRT)	yyyy-mm-dd	Yes (*)
6	L2	Percentage of guarantee consumption that triggers the communication of limit 2	Number (two decimal places)	-	Yes (*)
7	Data_L2	Date of L2 parameterization	Date	hh:mm:ss or hh:mm:ss,sss	Yes (*)
8	Hora_L2	Time of L2 parameterization	Time (BRT)	yyyy-mm-dd	Yes (*)
9	Consumo	Percentage of guarantee consumption for client classification	Number (two decimal places)	-	Yes
10	Data_C	Date of Consumption parameterization	Date	hh:mm:ss or hh:mm:ss,sss	Yes
11	Hora_C	Time of Consumption parameterization	Time (BRT)	yyyy-mm-dd	Yes

(\*) If the Participant uses a website/portal to communicate the guarantees' deterioration of both before and after the compulsory liquidation procedure, the field is not mandatory.

### 3.4 Anti-Money Laundering, Combating the Financing of Terrorism and the Financing of the Proliferation of Weapons of Mass Destruction (“AML/CFT”)

#### 3.4.1 Alerts and Records of AML/CFT Alert Analysis Conclusions

File description: All alerts generated, regardless of whether they were analyzed, in the period recording the conclusion of AML/CFT monitoring analyzes

Objective: (i) Monitoring analyzes generated and the deadline for analysis conclusions after the alert is triggered (AML/CFT); and (ii) Monitoring of communications of analyzes to COAF beyond 24 hours.

File name: REGISTRO\_ALERTASPLD

Frequency: Bimonthly

Scope: Base of 2 months, starting from 2 months prior to the request date, as per the example below:

Scope of Submission	Base that should be sent to BSM
May, 2024	Alerts generated in March, 2024
July, 2024	Alerts generated in March, 2024 and April, 2024*
September, 2024	Alerts generated in May, 2024 and June, 2024
November, 2024	Alerts generated in July, 2024 and August, 2024

(\*) Due to the change in the scope of the files, in May 2024 the scope will be maintained according to the layout manual 2.0 and BSM will only evaluate the formatting of the files. Starting in July 2024, tests will be conducted to assess the timeline for the conclusions of the analyses.
